G Known, Suspected or Likely Releases to the Environment:
Place an X in the appropriate boxes to indicate any known, suspected, or likely releases of wastes to the environment.

☐ Known ☐ Suspected ☒ Likely ☐ None

Note: Items Hand I are optional. Completing these items will assist EPA and State and local governments in locating and assessing hazardous waste sites. Although completing the items is not required, you are encouraged to do so.

H Sketch Map of Site Location: (Optional)

Sketch a map showing streets, highways, routes or other prominent landmarks near the site. Place an X on the map to indicate the site location. Draw an arrow showing the direction north. You may substitute a publishing map showing the site location.

See Attachment I

I Description of Site: (Optional)

Describe the history and present conditions of the site. Give directions to the site and describe any nearby wells, springs, lakes, or housing. Include such information as how waste was disposed and where the waste came from. Provide any other information or comments which may help describe the site conditions.

See Attachment II

J Signature and Title:

The person or authorized representative (such as plant managers, superintendents, trustees or attorneys) of persons required to notify must sign the form and provide a mailing address (if different than address in item A). For other persons providing notification, the signature is optional. Check the boxes which best describe the relationship to the site of the person required to notify. If you are not required to notify check "Other".

ATTACHMENT II

This site which included several buildings was established as a research facility for organic chemicals in approximately 1946. The site is located north of Patapsco Avenue adjacent to the main manufacturing facilities. Various chemicals were handled as commonly used in laboratory analysis and synthesis. FMC Corporation acquired this area with the purchase of the main plant in September, 1954. Research continued using the facilities until approximately 1972. These facilities were then demolished the following year. There exists the possibility that several dumping pits were used during the life of the research facility in this area although no specific knowledge of quantities of chemicals or classification are presently available. There are no residential wells, springs, lakes or housing in the vicinity of this site location. The nearest body of water (Stonehouse Cove) is approximately 1000 feet away.

Re: CERCLA - Superfund Section 103(c) Reporting

Gentlemen:

Our plants and facilities which are required to report under Section 103(c) of CERCLA have reported individually. As part of our review of facilities formerly owned by FMC which may have conducted reportable disposal practices, we initiated a search of records of all divested facilities. Such records are not centralized. Those facilities which have been identified have been reviewed and reported as appropriate. The search for other facilities is continuing. As they are identified, they will be reviewed and if reportable, we will so advise you.

Very truly yours,

N.C. Elphick
